## Report Environmental Violations - Submitted

Thank you for submitting information on a possible environmental violation. The information will be reviewed by EPA enforcement personnel.

This notice will be the only response you will receive regarding your submission. Due to the sensitive manner in which enforcement information must be managed by EPA, we cannot provide status reports or updates regarding any submission we receive through the Report Environmental Violations form.

## Report Confirmation

<b>Received</b>	Nov 6, 2018 at 11:22am EST
<b>Your Name</b>	David Callen
<b>Your Email</b>	1pvtxda@pm.me
<b>Your Phone Number</b>	3163616630
<b>Suspected Violator's Name *</b>	At&t, Verizon, TMobil, Austin Electric, ETC ETC ETC
<b>Suspected Violation Location *</b>	78701

<b>Suspected Violation City *</b>	Austin
<b>Suspected Violation State *</b>	Texas
<b>Suspected Violation ZIP Code *</b>	78701
<b>Responsible Party</b>	Company
<b>Is the suspected violation still occurring?</b>	Yes
<b>Date of Incident</b>	
<b>Characterized incident as:</b>	
<b>Intention *</b>	Accidental
<b>Violation Method *</b>	Falsified
<b>Affected Subject(s)</b>	Air, Documents

<b>Violation Description *</b>	<p>This explains the problem better than I can....</p> <p>" WHO 1981 Radiofrequency and Microwaves. Biologic Effects and Health report issued by the WORLD HEALTH ORGANIZATION as follows: [A Quote] to show WHO report covers from 100kHz to 300GHz as a full field including all "cellular and "smart meter" frequencies:]</p> <p>"The problem of this extraneous radiation or pollution from sources of 1 GHz electromagnetic waves varies from country to country, depending of industrialization. Radiation emitted from high power sources such as and telecommunication networks propagates over large distances and cover the whole circumference of the globe. With the increasing use of transmitter/receivers by sea and air traffic, and the necessity for ground control, increased levels of environmental electromagnetic radiation may be a problem in many countries.</p> <p>[AND:]</p> <p>"Problems of pollution range from electromagnetic interference, particularly in relation to the operation of health services, to direct risks to the health of humans."</p> <p>So with that stated, At&amp;t has already running the 5GHz (actually 24GHz) spectrum in businesses and going to ROLL it out to residential customers in December IF NOT STOPPED!</p> <p>AND.... this is what YOUR Agency stated....</p> <p>1993: Environmental Protection Agency (EPA)[stated]: The FCC's exposure standards are "seriously flawed."</p> <p>Official comments to the FCC on guidelines for evaluation of electromagnetic radio frequency radiation, FCC Docket ET 93-62, November 9, 1993 <a href="https://smartgridawareness.org/2014/04/18/nine-reasons-why-smart-meter-is-a-mistake/">https://smartgridawareness.org/2014/04/18/nine-reasons-why-smart-meter-is-a-mistake/</a></p> <p>1993: Food and Drug Administration (FDA)[stated]: "FCC rules do not address issue of long-term, chronic exposure to RF fields."</p> <p>Comments of the FDA to the FCC, November 10, 1993. <a href="http://wifiinschools.com/uploads/3/0/4/2/3042232/schools_and_organizations_comments_to_fcc_november_10_1993.pdf">http://wifiinschools.com/uploads/3/0/4/2/3042232/schools_and_organizations_comments_to_fcc_november_10_1993.pdf</a></p> <p>Do I need more to prove a immediate TREAT to humans, animals, fowl is TRAVELING thru the AIR that YOUR Agency is protecting.</p> <p>How about typing in NMRI 1972 PDF into a search engine and SEE the Biological Effects that they finished studies on 100MHz to 300GHz (the 5GHz and above is in those 2200 studies.)</p> <p>And I have at least 2800 to 3000 "peer reviewed" medical scientific studies show breaks in DNA, cancer, leukemia and MORE!</p> <p>Thank you for your time, IF YOU POSTPONE the 5G Rollout until all of us can STOP the AIR POLLUTION that using shielded Hard Wire or fiber optic CABLES STOP.</p>
